

Test
Date: 5/9/2026
Name:

1. Write down the output of the code below on the right.

```
def stars(n):  
    if n == 1:  
        print("***")  
    else:  
        print("*" * (n-1))  
        stars(n - 1)  
stars(4)
```

2. Given the code below, what is the output?

```
def values(a,b):  
    return a  
  
print(values(3,0))
```

3. Write down the output of the code below on the right.

```
def stars(n):  
    if n == 1:  
        print("*")  
    else:  
        stars(n - 1)  
        print("***" * n)  
stars(4)
```

4. Write down the output of the code below on the right.

```
def stars(n):  
    if n == 1:  
        return  
    else:  
        print("*" * (n-1))  
        stars(n - 1)  
stars(4)
```

5. Given the code below, what is the output?

```
for i in range(1,6,2):  
    print(i)
```

6. Given the code below, what is the output?

```
for i in range(1,4,0):  
    print(i)
```

7. Given the code below, what is the output?

```
for i in range(10,4,-2):  
    print(i)
```

8. Write down the output of the code below on the right.

```
def stars(n):  
    if n == 3:  
        return  
    else:  
        print("*" * (n-1))  
        stars(n - 1)  
stars(6)
```

9. Given a function kids below, what is the output of print(kids(2))?

```
def kids(age):  
    if 0 < age <= 1:  
        return 'Baby'  
    elif 1 <= age < 3:  
        return 'Toddler'  
    else:  
        return 'big kids'
```

10. Given a function kids below, what is the output of print(kids(1))?

```
def kids(age):  
    if 0 < age <= 1:  
        return 'Baby'  
    elif 1 <= age < 3:  
        return 'Toddler'  
    else:  
        return 'big kids'
```

11. Given a function kids below, what is the output of print(kids(6))?

```
def kids(age):  
    if 0 < age <= 1:  
        return 'Baby'  
    elif 1 <= age < 3:  
        return 'Toddler'  
    else:  
        return 'big kids'
```

12. Given the code below, what is the output?

```
for i in range(1,3):  
    break  
    print(i)
```

13. Given the code below, what is the output?

```
for i in range(1,3):  
    print(i)  
    break
```

14. Given the code below, what is the output?

```
for i in range(1,5):  
    if i == 3:  
        break  
    print(i)
```

15. Given the code below, what is the output?

```
ages = [78, 9]  
for age in ages:  
    if age >= 55:  
        print(age, "is a senior")  
    elif age >= 35:  
        print(age, "is middle aged")  
    else:  
        print(age, "is a youth")
```

16. Given the code below, what is the output?

```
names = ["Claire", "Joseph", "Xinwen", "Jennifer"]  
for i in names:  
    if i == "Claire":  
        print("found")  
    elif i == "Jennifer":  
        print("found")  
    else:  
        print("no")
```

17. Given the code below, what is the output?

```
a = 3  
b = 4  
print( a == b)
```

18. Given the code below, what is the output?

```
mylist = ["Joseph", "Xinwen", "Claire", "Seraphina", "Jennifer"]  
print(mylist[1])
```

19. Given the code below, what is the output of print(names[0])?

```
names = ["Claire", "Joseph", "Xinwen", "Jennifer"]
```

20. Given the code below, what is the output of `print(names[-1])`?

```
names = ["Claire", "Joseph", "Xinwen", "Jennifer"]
```

21. Given the code below, what is the output of `print(names[-3])`?

```
names = ["Claire", "Joseph", "Xinwen", "Jennifer"]
```

22. Given the code below, what is the output?

```
mylist = [1,3,4,11,7]
print(len(mylist))
```

23. Given the code below, write down the output.

```
arr = [100, -100, 0, 50]
n = len(arr)
for i in range(n):
    min_index = i
    print(min_index)
    for j in range(i + 1, n):
        if arr[j] < arr[min_index]:
            min_index = j
    arr[i], arr[min_index] = arr[min_index], arr[i]
```

24. Given the code below, write down the output.

```
arr = [100, -100]
n = len(arr)
for i in range(n):
    min_index = i

    for j in range(i + 1, n):
        print(j)
        if arr[j] < arr[min_index]:
            min_index = j
    arr[i], arr[min_index] = arr[min_index], arr[i]
```

25. Given the code below, write down the output.

```
arr = [100, -100]
n = len(arr)
for i in range(n):
    min_index = i
    for j in range(i + 1, n):
        if arr[j] < arr[min_index]:
            min_index = j
    print(min_index)
    arr[i], arr[min_index] = arr[min_index], arr[i]
```

26. Given the while loop code below, what is the output?

```
i = 10
while i <= 10:
    i = i + 2
    print(i)
```

27. Given the while loop code below, what is the output?

```
i = 9
while i < 10:
    print(i)
    i = i + 1
```

28. Given the while loop code below, what is the output?

```
arr =[1,7,2,5]
print(max(arr))
```

29. Given the while loop code below, what is the output?

```
arr =[1,7,2,5]
print(min(arr))
```

30. Given the code below, what is the output?

```
movies = ["Harry Potter", "Snow White"]
for movie in movies:
    print(movie)
    print(movie)
```

31. Given the code below, what is the output ?

```
value = -4
while True:
    value = value + 2
    if value == 2:
        break
    print(value)
```

32. Given the code below, what is the output ?

```
value = -4
while True:
    value = value + 2
    if value == 2:
        print(value)
        break
```

33. Given the code below, what is the output of print(sum(mylist))?

```
mylist = [1,3,5,7,4]
```
